MULTIPLE REDUNDANT NAVY & NAVY E.I.S. DOCUMENTS

(U.S. AIR FORCE & ARMY TESTING RANGES NOT LISTED)

According to Senator Dianne Feinstein, Senator Barbara Boxer, and Congressman Henry Waxman "...the Navy plans to increase the number of its exercises or expand the areas in which they may occur, and virtually every coastal state will be affected. Some exercises may occur in the nation's most biologically sensitive marine habitats, including National Marine Sanctuaries and breeding habitats... In all, the Navy anticipates more than 2.3 million takes (significant disruptions in marine mammal foraging, breeding, and other essential behaviors) per year, or 11.7 million takes over the course of a five-year permit." June 19, 2009 Letter to Dr. Jane Lubchenco, NOAA, U.S. Department of Commerce.

The United States Air Force also has a series of ranges some of which will be conducting bombing and sonar exercises in our oceans - imperiling more marine mammals.
